

WARNING!

Pipelines are the safest, most economical method of transporting petroleum and its refined products. But pipelines are vulnerable to the teeth of backhoes, the blades of excavating machines, and marine vessels dragging anchors. The four signs shown above are typical markers used to show the approximate location of pipelines. The markers show the product being transported, the operating company and a telephone number where a company representative can be contacted 24 hours a day.

CASING VENT

AERIAL
MARKER

If a warning marker is located near where you are working, even if it's on private property, call a company representative. The representative will provide you with the exact location of the pipeline at no cost. Don't take a chance! A ruptured pipeline can endanger lives.

Chevron Pipe Line's Company Customer Service Center
P.O. Box 4879, Houston, TX 77210-4879.

For non-emergency or routine inquiries we can be reached by calling collect at 281-596-2828.
